

**FERN**  
FUNDY ENERGY RESEARCH NETWORK

*Fostering Collaboration in Tidal Energy Research*

*The FERN Model: Building Knowledge through Inclusivity & Partnership*

FERN is an independent non-profit network dedicated to fostering research collaboration, information exchange and capacity building to advance knowledge, understanding and technical solutions related to the environmental, engineering and socio-economic factors associated with tidal energy development in the Bay of Fundy.

Membership is **FREE** and open to anyone interested in tidal energy-related research. Please visit our website: <http://fern.acadiau.ca> for further information.

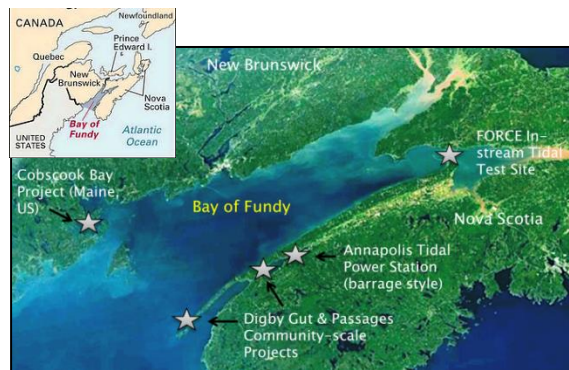

E-mail: [fern@acadiau.ca](mailto:fern@acadiau.ca)

*Funding and host support:*

## Tidal Energy Activity in the Bay of Fundy

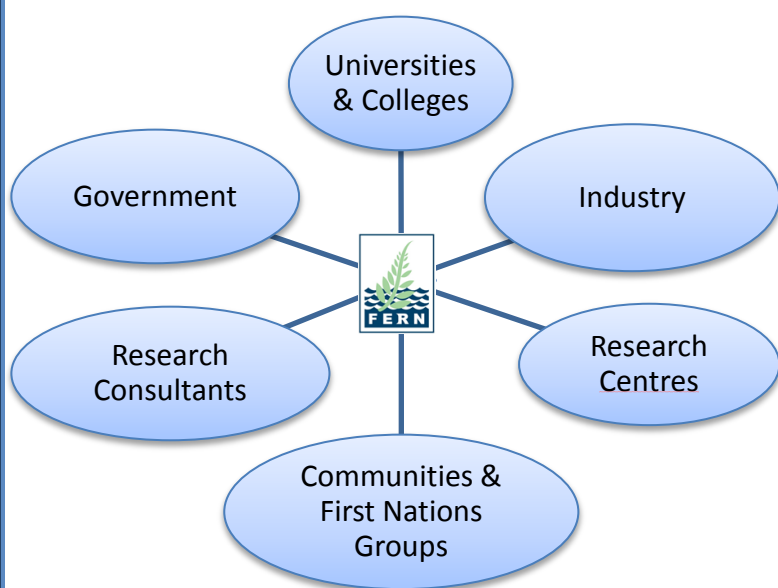

With its range of moderate to extremely high energy environments, the Bay of Fundy serves as a prime area for commercial and community-scale in-stream tidal energy research and demonstration.

### FERN Functions & Activities:

- ✓ Fosters generation of multi-institutional / sector research partnerships, projects and teams;
- ✓ Advances stakeholder participation in independent, high quality research and monitoring initiatives;
- ✓ Facilitates optimal use of resources, expertise and data by enhancing communication, cooperation and information sharing;
- ✓ Delivers credible, objective, multi-disciplinary tidal energy guidance to Fundy test centres, developers, industry, government and the community.
- ✓ Provides information and data sharing tools and opportunities, including subcommittees, technical reports, newsletters, website, webinars, workshops and symposia.
